Forecast for Monday 19 Oct 2020

Weather: A cloudy day with persistent rain, some prolonged spells of heavy rain are expected too. A chance that Arran and Kintyre may see drier conditions at first but this won't last long.

Chance of cloud free mountain/hill tops above 800m: Extensive cloud down to 400 to 600 metres across most ranges throughout the day. However more sheltered western ranges of Argyll and southern ranges of Lochaber may see much more broken low cloud.

Visibility: Perhaps middle distance hills seen beneath the cloud at times, but often poor or very poor.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Chance of gales on the very highest tops. Burns expected to become fast flowing by afternoon.

Forecast for Tuesday 20 Oct 2020
Weather: Cloudy and wet start, drier conditions moving northwards in the morning. Then a few hours of dry weather before further rain spreads northeast in the afternoon and evening.

Maximum wind: Southeasterly winds gusting to 30 mph

Chance of cloud free mountain/hill tops above 800m: Low cloud expected to remain persistent down to 300 metres throughout the day, perhaps some brief clearer interludes over southern Kintyre and Arran.

Visibility: Rather hazy, perhaps good at first across the south.

Temperature: **Glens:** Plus 8 rising to 13 Celsius
At 800m: Plus 8 Celsius
Freezing level: Above summits
